

Supply Chains - Disruption in the Covid Era

Supply chains ensure a smooth transition from harvest to customer purchase. Learn how the bumps in the road from COVID impacted the supply chain process on the global food supply.

Event Components:

This pre-recorded event will highlight how the Covid-19 pandemic has impacted the food supply chain - from farmers and livestock owners to grocery stores and restaurants. Industry professionals will discuss how they have adapted during this era and how it has changed food production for the future.

Service Area:

Agriculture, Food & Natural Resources

Audience:

Students

State Standards Covered:

- *FPP.04.01.02.a. Examine the impact of consumer trends on food products and processing practices (e.g., health and nutrition, organic, information about food products, local food movements, farm-to-fork supply chains, food system transparency, etc.).*

For Educators & Students

Pre-Event Question to Consider:

- When we talk about the food supply chain, what are we talking about?

Post-Event Questions to Consider

- What disruptions occurred to the food supply chain in the last two years?
- What are the threats to the food supply chain?
- What changes have been put in place to deal with food supply chain disruption?
