STUDENT
EXPERIENCES FY2020

* INTERNSHIPS
* JOB SHADOWS
* STUDENT TOURS

Our 15 regional Intermediary networks made it possible for students to experience quality work-based learning activities across all 16 career clusters. The regional Intermediary contacts worked closely with school districts to offer experiences that aligned with students' interests. This is most often done through a needs assessment conducted by the regional Intermediary network contact and a school district representative. Students are connected with career cluster-related opportunities that are of interest for the students.

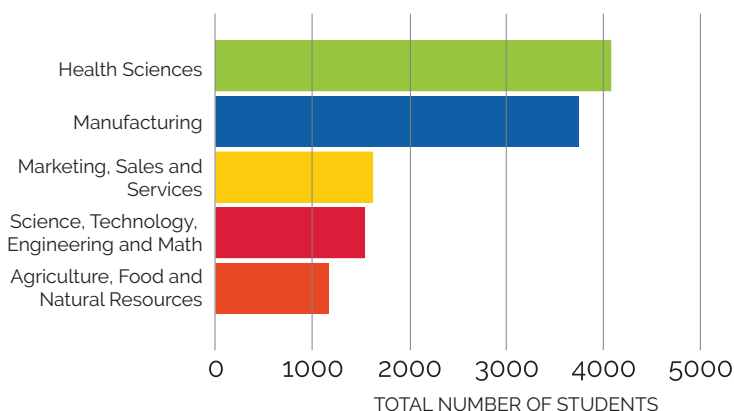

Anna, a Prairie High School student, took advantage of an internship opportunity as a Student DNA Research Intern with the University of Iowa – Department of Occupational & Environmental Health.

"Doing an internship is so helpful before you go to college! It allowed me to learn what I could potentially be doing as my career!"

There are so many amazing job opportunities, right here in Iowa! To learn more about job shadow and internship opportunities, visit iowain.org to get in contact with a coordinator in your area!
